

UCLA/Caltech Integrated Cardiometabolic Medicine for Bioengineers (iCMB)

The University of California at Los Angeles (UCLA) and the California Institute of Technology (Caltech) are partnering to provide a 2-year, structured curriculum for training the post-doctoral engineers, biophysical or biomedical scientists into leadership roles in academia and industry. The goal is to strengthen individualized training in 1) advanced sensing or 2) imaging coupled with machine learning 3) to address cardiometabolic disease and improve access and quality of care.

The UCLA/Caltech iCMB program welcomes the under-represented applicants.
